

## Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education ([www.cool4ed.org](http://www.cool4ed.org)). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextbooks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Total Points: 12 out of 30

Please provide comments on any aspect of the subject matter of this textbook:

- This very brief book (only 3 chapters) covers the basics of music theory in a very cursory manner.
- It fails to address the course content of MUS 110 - Music Fundamentals by omitting handwritten notation of pitch and rhythm. Indeed, it doesn't address the content of notation, rhythm, or meter at all.
- Music Fundamentals courses typically include workbooks and exercises for learning notation, pitch, rhythm, meter, etc. Strong books for this course would include interactive demonstrations with aural examples.
- In this book, workbook assignments are extremely limited and not particularly helpful for learning.
